

GTECHNIQ

PLATINUM FABRIC & CARPET PROTECTION

GTECHNIQ Platinum Fabric Protection

Unlike regular fabric coatings the nano particles of GTechniq Platinum Fabric Protection coat the individual fibres of the fabric thereby leaving the “breathability” and feel of the fabric unaffected. This means that any stale air can still escape but at the same time repelling any water or oil based liquids. Being solvent based this ensures a much deeper penetration of the active ingredient, giving a **GTechniq Platinum Fabric Protection** treated surface better durability and overall performance than other generation fabric sealants.

GTECHNIQ Platinum Fabric Protection

Smart Surface Science Protects Against:

- » Liquid Spills
- » Food
- » Harmful UV Rays
- » Perspiration
- » Fabric Fading
- » Odours
